

Express RAM CACHE and Ceedo USB 3.0 Virtual PC™

With the introduction of USB 3.0, external storage devices can now function at unprecedented speeds; up to 10x. This new found speed blurs the line between internal and external storage and has enabled some exciting new usage models.

Ceedo Personal is a portable Windows™ environment that runs from a USB flash drive. It can transform a flash drive into a virtual PC. Using Ceedo, many standard Windows™ applications can now be made portable for use on any PC; making it possible for you to install, carry and run the same standard Windows applications that you already own and already know how to use.

By combining Ceedo Personal and our USB 3.0 Express RAM CACHE drive, we are able to create a Windows™ Virtual PC environment that is FAST, flexible and totally portable. Now Any PC can be Your PC.

The Ceedo virtual desktop is perfect for anyone that:

- Uses more than one PC
- Shares a PC
- Travels
- Students

Since Ceedo works in user mode, it's perfect for students. Computers located in the Computer Labs and campus libraries are generally "locked down" in user mode with no hope of installing an application. Now students can take their applications with them and utilize any PC on campus as their own. For the traveler, the hotel business center becomes a much more productive place when you have your applications, browser, passwords, email clients and calendar with you.

Not quite ready for USB 3.0 yet? Not a problem. The four channel architecture and DRAM caching system found in the USB 3.0 Express RAM CACHE not only works in USB 3.0 but also makes it the fastest USB 2.0 drive you've ever seen. Four channels of cache enable us to literally fill the USB 2.0 bus to capacity. And the DRAM Caching system delivers REAL World performance, even on the USB 2.0 bus. The caching system elevates small block performance which is very important for many Windows application calls; and all this still works even from a USB 2.0 port.

Part Number	Description	MSRP
ST3U16ERS	USB 3.0 Express RAM Cache, 16 GB	\$59
ST3U32ERS	USB 3.0 Express RAM Cache, 32 GB	\$119
ST3U64ERS	USB 3.0 Express RAM Cache, 64 GB	\$209
ST3U16ERS1	USB 3.0 ERC & Ceedo Virtual Desktop bundle, 16 GB	\$79
ST3U32ERS1	USB 3.0 ERC & Ceedo Virtual Desktop bundle, 32 GB	\$139
ST3U64ERS1	USB 3.0 ERC & Ceedo Virtual Desktop bundle, 64 GB	\$229

The Ceedo Virtual Desktop bundle includes: Ceedo Personal 4.0 and Backup & Restore - a \$39 value!
